REMEDIAL SERVICES

ACTION
environmental

Action Environmental's ability to successfully meet the needs of our clients is rooted in the experience of our management team, the skills of our employees and our commitment to health, safety and the environment.

Action Environmental's **unique approach to managing larger, more complex and longer term projects** ensures the highest level of experience in the company is applied to the project. Our corporate operations group, comprised of our most skilled and experienced staff, scope, estimate and manage these projects. While managed centrally, these projects are staffed locally to maintain a **strong local service presence**. This ensures that our clients receive the highest quality service we have to offer. We believe our approach, experience and skills are without equal.

Our goal as an organization is simple: to be recognized as the best at what we do by our customers, suppliers, competitors and employees.

Action Environmental provides environmental services and industrial services which have a broad application across many industries. We also provide specialty services that are specific to certain customers or industries. While not universal in application, these services are a critical part of our customers' needs.

ENVIRONMENTAL SERVICES

- Abatement Services
- Emergency Services
- Field Services
- Oilfield Services
- Professional Services
- Waste Services

INDUSTRIAL PAINTING

- Painting and Coating
- Surface Preparation

INDUSTRIAL SERVICES

- By-Product Management
- Industrial Vacuum and Cleaning
- Municipal and Construction Support
- Roof Ballast Removal
- Silo and Bin Cleaning and Maintenance
- Tank Maintenance and Repair

EQUIPMENT

Action Environmental makes significant investments in company-owned and maintained equipment which means we're well prepared to meet the diverse needs of our customers. In addition to a fleet of over 100 service trucks, Action Environmental owns more than 80 pieces of specialized equipment including vacuum trucks, liquid vacuum trucks, frac tank service equipment, tractors and winch trucks, dump trucks, bob tail roll-off trucks and jetter trucks, as well as more than 20 pieces of construction equipment including excavators, front end loaders, skid steers, back hoes, road trucks and several drilling rigs.

SAFETY AND TRAINING

Action Environmental's employees are well trained, meeting or exceeding industry standards. From our new hire regulatory training programs to our advanced level training and in-house train-the-trainer programs, we are committed to the safety of our employees. We have several OSHA authorized outreach trainers for OSHA 10-Hour and 30-Hour courses, which are basic requirements of newly hired employees, as well as MSHA competent trainers, explosive awareness trainers, and certified OSHA HAZWOPER instructors. As applicable, employees also receive the Federal Railroad Administration (FRA)'s Roadway Worker Protection Training, Operator Qualification Training for pipeline personnel, permit required confined space entry training, and confined space rescue training.
