SILO AND BIN CLEANING

ACTION
environmental

Action Environmental is ready to solve your bulk storage flow problems. We want to help rid you of any build-up, ratholing, bridging, or plugging that you may have. We understand that product flow is the life of a production line and we offer a wide variety of services to handle your flow problems.

Action Environmental will effectively enhance our customer's operating efficiencies by removing, minimizing and managing material from their operations. We will accomplish this by utilizing proven methods, experienced and qualified personnel, and developing innovative technical solutions to solve complex issues with a value added approach.

BIN WHIPPING – Our hydraulic whip is designed for safer, faster, and easier cleaning of your silos. The whip operates from the top of your silo, keeping personnel safe from dangerous confined space entry while forcefully removing materials without damaging your walls. We can work silos from 4' x 4' to 30' x 150'. Our whip can restore your silo back to capacity.

BIN DRILLING – We have the answer to your bridged material. Our drill is the way to break through material in your silo. It is operated from the top of the silo, eliminating confined space entry for personnel. We can drill depths up to 150' deep. Once the drill pierces a hole through the bridged material, it allows us to use our whip to start removing material to get you running again. The unit requires a 440 Volt 3-phase hook-up.

VACUUM TRUCK AND WATER BLAST SERVICES – We offer vacuum trucks if material can't be fed out and water blasters if material needs to be washed out.

CONFINED SPACE ENTRY – We offer confined space entry if entry can be safely accomplished.

- Abatement Services
- Emergency Services
- Field Services
- Oilfield Services
- Professional Services
- Waste Services

INDUSTRIAL PAINTING

- Painting and Coating
- Surface Preparation

INDUSTRIAL SERVICES

- By-Product Management
- Industrial Vacuum and Cleaning
- Municipal and Construction Support
- Roof Ballast Removal
- Silo and Bin Cleaning and Maintenance
- Tank Maintenance and Repair

EQUIPMENT

Action Environmental makes significant investments in company-owned and maintained equipment which means we're well prepared to meet the diverse needs of our customers. In addition to a fleet of over 100 service trucks, Action Environmental owns more than 80 pieces of specialized equipment including vacuum trucks, liquid vacuum trucks, service equipment, tractors and winch trucks, dump trucks, bob tail roll-off trucks and jetter trucks, as well as more than 20 pieces of construction equipment including excavators, front end loaders, skid steers, back hoes, road trucks and several drilling rigs.

SAFETY AND TRAINING

Action Environmental's employees are well trained, meeting or exceeding industry standards. From our new hire regulatory training programs to our advanced level training and in-house train-the-trainer programs, we are committed to the safety of our employees. We have several OSHA authorized outreach trainers for OSHA 10-Hour and 30-Hour courses, which are basic requirements of newly hired employees, as well as MSHA competent trainers, explosive awareness trainers, and certified OSHA HAZWOPER instructors. As applicable, employees also receive the Federal Railroad Administration (FRA)'s Roadway Worker Protection Training, Operator Qualification Training for pipeline personnel, permit required confined space entry training, and confined space rescue training.
